\$2 per year, single copy 5c

## Early Morning Flight of Trans-Canada Air Pageant

Unique and Inspiring Sight as  
Large Number of Planes Flying  
in Formation Cross Rocky  
Mountain Divide in  
Early Dawn

Citizens of Coleman and other Pass towns were awakened shortly after daybreak on Monday by the droning of airplane engines, as 15 machines of the Trans-Canada air pageant winged their way towards Vancouver, after visiting Calgary, Lethbridge and other western cities. It was 4:40 a. m. when the first machine came into view, followed within half an hour by groups of

other machines, there being in the largest group five planes flying north of the track, and three south of the track. The last two to be noticed included the extraordinary auto gyro, which rises vertically and has the revolving plane on top of the machine instead of on the nose of the plane. The revolutions of the propeller blades could be easily distinguished as it passed over.

The tri motored plane of the Ford Co. made a louder noise than any of the others, and it was indeed a heavy sleeper who would not have been awakened by it had he been sleeping below the path it took through the air.

Though it was still grey dawn on the ground, the planes were tinged with the slanting rays of the rising sun as they sped westward several thousand feet above the Pass. It was an inspiring sight, and caused

those who peered at the machines to wonder how far ahead of the rising sun they would continue. It was a still morning, no wind, and the fleet looked like a flock of huge birds in their speedy trip across the mountain range. It is the largest group of planes on record to pass over the Canadian Rockies. Some early risers stated there were 15 planes in the flight, whilst one man stated he counted 17.

## Death of Sam Strizick

After several months illness, Sam Strizick died in hospital on Saturday, aged 48 years. He leaves a wife and children in Romenia, and had lived here for several years.

The funeral was held on Monday, members of the National Slavonic Society, Catholic Sokol and other fraternal lodges marching in parade, as well as members of the Miners union headed by Bellevue silver band. The funeral service was held at Holy Ghost church, Rev. Fr. Lehman officiating, and burial in Coleman Catholic cemetery.

## Baseball

Coleman were hosts to Blairmore ball club on July 14, defeating them by 11-5. The game proved highly interesting. Blairmore went strong in the first two innings, scoring two runs, and the game appeared to be up in the air for Coleman. The home boys rallied and in the fourth inning commenced their "slugfest," getting 7 runs. From then on the game was good to watch, Blairmore threatening once but not enough to overcome the lead.

A late-rising crowd turned out to the game, and the cheering was a great help to the home boys. Atkinson and Richards performed for Coleman; Evans and Bles for the boys from Blairmore.

## PICTURE BUTTE GAME

On Monday afternoon the local club were hosts to Picture Butte, a hefty bunch of players from the prairie, who put it over the home team by a score of 9-6. The day was extremely hot, and the locals were off color and did not hit their stride. A small crowd witnessed the game, owing to the time being changed from 6:30 p.m. to 2:30 p.m., as the visitors were billed to play Blairmore in the evening.

## ST. ALBAN'S CHURCH

Next Sunday, the 8th after Trinity, the service will be morning prayer at 11 a.m.

The Church Army Crusaders will open their week's mission in Coleman and Blairmore on Monday, and nightly services will be held in the church at 8 p.m. Captains Bewley and Casey will be the missionaries. During their stay in Lethbridge they were warmly welcomed, and Archdeacon Swanson said the people there were sorry to see them leave.

It is anticipated that Coleman and Blairmore parishioners will extend them a hearty welcome and extend them hospitality.

Various parties went out over the week-end fishing. Tom Flynn, Dave and his friend Jiggs Jeffrey of Victoria went out to South Fork in company with Mr. Hamilton of Blairmore; Maurice Cooke, Frank Oreggan, Mr. and Mrs. Purvis, went out to North Fork and had a fair day's catch; Albert and Sidney Short, J. Cady and J. Houghton went to Racehorse Creek and three back all the small ones, while Mr. Ford and family and Jackie Houghton went south and came back with a fair catch. It was a stewing hot day, one of the hottest of the year.

## Balloch Plays Well at Banff All-Star Tennis Tournament

Bill Balloch might be considered No. 3 tennis player in Alberta. At the Banff meet of tennis stars this week he was matched against Kinloch, Edmonton city champion, and lost by three points in the first set and the same in the second, a total of six points. Bill's style as a championship player is improving greatly.

## The Week's Football Notes

Coleman football club played at Corbin on Sunday, the score being 4-3 in favor of Corbin. Anderson and Duffield were the two best men in the field for Coleman. Dawson, McDonald and Jackson were the stars for Corbin. There was a big crowd out to see the game, despite the heat. The return game will be played on Thursday, July 23, at 8:30 p.m. on Coleman field.

## MATCH CUP DRAWS

Draws for the club matches, open to all teams in the Pass, are as follows:

Coleman vs. Bellevue; Fernie vs. Corbin; Michel vs. Coal Creek; Hillcrest drew a bye.

Draw for the Crane cup: Bellevue vs. Coleman; Corbin vs. Fernie; Coal Creek vs. Michel; Hillcrest drew a bye.

The games will be played on the ground of the first named team in each case, knockout games.

## Local News

Mr. and Mrs. Chas. Chardon and children visited at Lethbridge and Macleod over the week end.

Jack Wilson returned last Thursday from a two weeks holiday motoring to the Pacific coast.

Mr. and Mrs. George Brown, Sixth street, returned on Tuesday of last week from two weeks holiday at Seattle and Spokane.

A spot dance (special) will be held at Crow's Nest lake pavilion on Thursday night, July 23, starting at 7 o'clock. Free dancing 7 to 7:30 p.m. First class orchestra.

Hugh Dunlop won a \$2.50 gold piece for selling the winning ticket on a gold watch drawn for at Wetaskiwin. A Dewar of Coleman won the watch, a very good time piece.

Mrs. J. A. McLeod and Mrs. C. J. Devine have joined the angling fraternity, having qualified by hooking some fine speckled trout in Racehorse creek. Mrs. Wm. Stevenson of Hillcrest, who with her husband camped for several weeks at North Fork ford, made it a practice to wade the streams almost daily and land a few "shiners."

Joe Spivek returned on Monday from a week's vacation at Banff. As Joe stepped off the train, in his plus fours and with the air of a millionaire, loungers at the station first thought it was a new arrival looking for diversion. But as Joe said, "All my old pals at Banff were wearing 'em, so I figured I would wear 'em too!"

Frank Barringham announces a cheap rate by car to Waterton Lakes Park, of \$3.00 return trip, per person, provided there are not less than three. He also states that transportation rates to the cities will apply and would be glad to take parties to Lethbridge, Calgary or other points. This enables those not owning cars to make the trip in a convenient and economical way, without undue delay of any kind. See him for rates.

## Local News

Hugh Dunlop is spending holidays and spent part of the week attending Lethbridge exhibition.

Mr. Muir, sr., who has been ill for some time, is reported to be considerably improved in health.

Freight haulage by truck lessens the demand for steam coal, therefore merchants should insist on having freight shipped via C.P.R.

Mr. and Mrs. W. L. Borrows and son are spending two weeks holidays at Lethbridge and Waterton Lakes Park.

Wm. Donaldson of Kimberley, former well-known tailor in Coleman, renewed acquaintances on Monday, and paid The Journal a friendly call.

Mr. Melville Anderson, of Anderson & McLean, sight specialists, of Calgary, announces next visit to G. R. Powell's, Coleman, Tuesday, Aug. 4th. 20 years experience and regular visits assure you of satisfaction in all optical work.

## Shareholders Meeting Inland Petroleum Ltd.

Report of Directors Covering the  
Year's Work Will Be Submitted  
Next Wednesday

The annual meeting of shareholders of Inland Petroleum, Limited, will be held in the Empire hotel on Wed. July 29, at 3:30 p.m., when there will be presented the report of the directors, the balance sheet, statement of income and expenditure and auditor's report. Directors for the ensuing year will be appointed. Copies of the directors' report and financial statement of the company were mailed last week.

During the year two wells were drilled, in the Red Coulee field, one on the Montana side of the International border.

A. M. Morrison is president of the company, and A. Denamore is secretary and managing director.

Mrs. A. Beveridge and Betty were visitors to Calgary.

## COLEMAN SCHOOL DISTRICT

## PAY TAXES EARLY

## Save 10 per cent.

Rebate of 10 per cent. will be granted on Current Taxes amounting to over minimum of \$4.00 paid on or before 4 p.m., Wednesday, the 29th day of July, 1931, and from July 30th to August 20th, at 4 p.m., 7 per cent. rebate will be granted on Current Taxes amounting to over \$4.00.

## REMEMBER:

That taxes not paid by January 1 will have added 5 per cent., and an additional 5 per cent. for every six months thereafter that they remain unpaid.

## It Pays to Pay Your Taxes Early

JAMES FORD, Secretary-Treasurer.

## Important Notice re Coleman Public Schools

All parents having children entering the primary grade in September must register names with the secretary, at Town Office, on or before July 28th, 1931. New pupils must be not less than 6 years of age on September 1st.

Copy of child's birth certificate or similar evidence should be presented at time of application.

JAMES FORD,  
Secretary-Treasurer.

### Where Are We Astray?

Out of the present world depression good will eventually come. This prediction can be made with absolute confidence and certainty of fulfillment because lessons are being learned and the need for reforms being demonstrated which will force action resulting in the application of remedies.

But at the present moment if the question is asked: What reform is most imperative, what action should be first taken, there are almost as many answers as there are people. There is no agreement as to what has caused world conditions; there is even less agreement as to the course of action necessary to reach solutions and to prevent a recurrence of such depressions. Mankind in its world relationships must have violated some of the fundamental laws of Nature to have brought down upon itself such a world calamity. But, if so, no one appears to be able to put their finger on the spot and declare authoritatively: "There lies the trouble."

All of which leads to the thought and the question whether our much vaunted systems of education are not very much at fault in the very foundations upon which they are erected. Much thought is expended upon the devising of a curriculum, in the preparation of text books, in the academic training of teachers, and hundreds of millions of dollars are expended in school buildings and equipment of all kinds. This has been going on for generations, yet when a world condition develops such as we are now experiencing, and from which we all suffer, the thinking of the world is confused and muddled. Statesmen, economists, financiers, world leaders in all branches of industry, all are at sea; all running around in circles; none advancing this theory as a solution only to be met by another absolutely contrary theory. No one seems to stand on solid ground, able to advance a clear case or an incontrovertible argument.

What is the basic cause of all this confusion? Is it not to be found in the fact that in our educational methods we have failed to ground our people in a true knowledge and acceptance of the immutable laws of Nature, failed to teach people to think, and to think straight, with the result that the world has been devising and trying out all kinds of artificial man-made devices and experiments, many of them in open defiance of Nature's laws, instead of remaining true to those laws.

Have we not in our educational systems devoted time and energy on many frills; have we not emphasized a narrow, even boastful nationalism; have we not placed a premium on the so-called higher education and the securing of degrees too numerous to mention, but failed to educate men and women to really think, to accurately weigh and rightly gauge the verities of the world in which we live in the full light and knowledge of those laws of Nature, ignorance and violation of which mean suffering, loss and disaster?

To illustrate: Let any two men meet and begin a discussion of present day conditions, and where does the conversation lead them within a few minutes? They begin by discussing wheat, its price, the marketing of it, whether there is over-production or under-consumption, the effect of Russia's "Five-Year-Plan" on Canada and the world, and at once they are attempting a discussion in political economy. Possibly they start by talking ordinary partisan politics, and at once they are into a discussion of tariffs, Protection versus Free Trade, currency and banking, trade treaties, markets,—in a word, political economy. Or taxation is the subject. They are agreed it is excessive, but they agree, and the man favors this method of raising necessary revenues; the other has directly opposite views. Again it is political economy. Or possibly they begin a discussion of religious creeds or the racial origins, characteristics, and emigration of people,—and they land in political economy.

But how many understand political economy which is affecting every nation, every home, every life today? What have our schools really taught us about it? Practically speaking, nothing. It is left as a study for the limited few who reach the higher grades, the colleges and universities, and even then it is the odd one who obtains more than a hazy idea of it.

Notwithstanding this universal ignorance of even the primary principles of the subject, we are today all talking, or attempting to discuss, political economy. The present depression has made it the current topic of conversation, the language of the street, the office and the home. And what do we know about it? How profoundly ignorant we are. And because of this universal ignorance, every quack proposal, every quixotic idea, gets a hearing, and in various quarters acceptance as a cure-all for our troubles.

The question presents itself: Should the study of political economy not be made the most fundamental of all studies for the youth of today, commencing early in the lower grades and continuing through our educational system? Let us study the verities of life, above all let us teach and train the coming generation along more practical lines, and instead of striving to cram a vast amount of information on certain given subjects into their young minds, ground them in the truth and beauty of Nature and Nature's laws and then train them to think for themselves and apply those laws in every activity of life, individually, nationally, internationally.

#### Famous Estate For Sale

Glencoe, Lord Strathcona's famous estate in Scotland, is for sale. It covers more than 75 miles, its boundaries stretching 22 miles from Loch Leven to Rannoch. Glencoe was the scene of the 1692 massacre of the MacDonnells. The sentinel rock, from which the signal for the massacre was given, is on the property.

#### Of No Importance

Social Visitor: Of course, closing the saloons has raised your husband's standing in the community.

Mrs. Dooley: Sure, an it's the other way, mind. In the old days Mike was pointed out by everyone as the village drunk, but now you'd think he was just nobody.

Vegetable oils are said to be a good fuel for some Diesel engines.

#### Well Fortified

"We are going forty miles an hour. Are you game for another ten?" said a motorist to his companion.

"Yes," he replied, as she swallowed another mouthful of dust, "I'm full of grit."

Fossil monkeys found in Holland indicate that the climate of that country must have been warmer at one time, in the geologic past.

## The Mother of Seven Children Used It for Diarrhoea

Mrs. Ray Drinkwater, R.R. No. 2, Hagersville, Ont., writes:—"I am the mother of seven children, and last summer one of them, 17 months old, was taken very sick with diarrhoea, and I thought she was going to die. My husband went 7 miles to see what my sister had given her baby, and he came home with a bottle of Dr. Fowler's Extract of Wild Strawberry. I gave the child a few doses and she was soon well again. My other children also had diarrhoea at that time and I gave them Dr. Fowler's with the same results."

#### Millions For Relief

309,000 Persons Given Employment Through Public Works  
Expenditures throughout Canada on public works arising out of the \$20,000,000 unemployment relief grant made by the Dominion Government in the special session last fall, had reached a total of \$70,555,000 at the end of June. A statement issued by the labor department shows 309,000 persons were given employment with a total of 6,637,000 man-days of work.

By provinces the division of expenditures was: Prince Edward Island, \$200,000; Nova Scotia, \$2,338,000; New Brunswick, \$1,452,000; Quebec, \$10,064,000; Ontario, \$15,556,000; Manitoba, \$2,563,000; Saskatchewan, \$2,900,000; special relief for drought areas in Saskatchewan, \$1,014,000; Alberta, \$2,839,000; British Columbia, \$3,423,000.

In addition the Canadian National Railways carried out work amounting to \$14,113,000, the Canadian Pacific Railway, \$11,514,000 and \$2,465,000 was spent through the grade crossing fund.

Up to the end of June, 88,900 families had been given direct relief. Where returns were made to the department on the basis of persons receiving direct relief the total was in the neighborhood of 390,000.

Expense of the special works undertaken to relieve unemployment was provided one-quarter by the Dominion, one-quarter by the provinces, and the balance by the municipalities.

#### Peace Motion Tabled

Proposal of Miss Agnes MacPhail Disapproved By Committee

Proposal of Miss Agnes MacPhail, Progressive member for South East Grey, to establish professorships and scholarships in Canadian universities to promote peace was disapproved in a report by the industrial and international relations committee tabled in the House of Commons.

The committee had under consideration a resolution by Miss MacPhail that "in the opinion of this House for every \$100 spent for war, one dollar should be spent to promote peace by instituting international professorships and scholarships in the leading Canadian universities."

Persian Balm is irresistible. Fragrant as summer flowers. Cool as a mountain spring. Wonderfully invigorating. Softens and whitens the hands. Makes skin soft-textured and youthful. Used by women as a powder base and as a perfume to love's complexion. Used by men as an effective hair fixative or shaving lotion. And for children, nothing soothes and protects their tender skin like the delicately cool Persian Balm.

#### Willing To Oblige

A Philadelphia man called up to urinate the other day and said: "Send me 30,000 cockroaches at once."

"What in heaven's name do you want with 30,000 cockroaches?" "Well," replied the householder, "I am moving today and my lease says I must leave the premises here in exactly the same condition in which I found them."

Poison Ivy is not ivy at all, but was so-called by Captain John Smith who encountered it, with unpleasant results, and thought it resembled the English ivy.

A Spaniard introduced tobacco into Spain from the West Indies in 1559.

#### Will Erect Seadromes

Trans-Atlantic Air Lines Soon To Be In Operation

The first of eight seadromes, proposed man-made islands to dot the Atlantic at intervals of 380 miles between the United States and Great Britain, will be constructed off the coast of United States next spring. Captain Hugh Duncan Grant, meteorological consultant to the promoters of the project, announced recently.

Grant, visiting in Akron, Ohio, predicted that within a year from the placing of the first seadrome the other seven ocean landing fields will be completed and a trans-Atlantic air line in operation.

The seadromes, Captain Grant explained, will have a six-acre deck, which will be 70 feet above the water surface, or 30 feet higher than storm waves. The seadromes will be buoyed by air tanks extending 40 feet below the surface. Ballistic tanks, filled with zig-zagging, will extend 177 feet downward.

#### Australia's New Stamps

Unique Design Commemorates World Flights of Kingsford-Smith

After some delay Australia has issued the Kingsford-Smith stamps to commemorate his world flights. The set consists of a two pence red, and a three pence blue. There is also a six pence deep mauve, issued for air mail service. Each of the three stamps have the same design, an aeroplane flying between the two hemispheres, with the inscription "Australia" at the top of the stamp, and "Kingsford-Smith's World Flight" at the bottom. The values are in small oval tablets in the lower corner, and the word "postage" at each side. The only difference in the air mail stamp is that instead of the words "postage" on each side, the words "Air Mail Service" are inscribed. When these Commemorative stamps were placed on sale in Melbourne the six penny air mail was bought so heavily, that the supply was exhausted within fifteen minutes.

#### An Unusual Convention

Four Hundred Diversers Of Water Attended Meeting In Italy

Four hundred divers, including professors, physicians, priests, workmen and several women attended the first congress of rhabdomyancy—diving of water, precious metals, etc.—at Verona, Italy, recently. In order to test the delegates' capacities, a commission of engineers dug nine holes ten feet deep in the municipal stadium and buried in them metals and pipes containing running water. Armed with rods, willow, or metal, the divers discovered all the spots. Professor Mercati, of the Rome University, declared that he was so sensitive that he was obliged to wear rubber-soled shoes to avoid disturbing sensations when he was walking about.

A Power Of Its Own.—Dr. Thomas' Electric Oil has a subtle power of its own. All who have used it know this and keep it by them as the most valuable liniment available. Its uses are innumerable and for many years it has been prized as the leading liniment for man and beast.

#### Plan Visit To Russia

Visas have been granted by the Soviet Government to George Bernard Shaw, Lady Nancy Astor, and a party of distinguished Britons who have announced their intention to visit Russia this summer.

#### ABANDON PACIFIC OCEAN FLIGHT

Inability to manage the plane, "Fort Worth," in heavy winds with more than 300 gallons of gasoline, was given by Robb (left) and Harold S. Jones, Texas aviators, as the reason for abandoning their Seattle-Tokyo flight. The fliers reached Nome, but decided not to continue their 5,100-mile hop to Japan.

## MACDONALD'S

### Fine Cut

Canada's Finest Cigarette Tobacco with ZIG-ZAG papers attached

#### Penalty For Nude Parades

Three Years' Imprisonment May Be Imposed Under Proposed Amendment

Three years' imprisonment for parading while nude may be imposed under an amendment to the criminal code which will be introduced in the House of Commons shortly by Hon. Hugh Guthrie, Minister of Justice. The amendment is proposed with a view to putting a stop to nude parades by Doukhobors of western Canada. It is comprehensive in its character. In the first place it provides a penalty of three years on summary conviction for nude parades. The same penalty may be imposed on anyone found nude in any public place, found nude on private property not their own, or found nude on their own property exposed to public view.

The term "nude" is defined in the amendment as being so scantily clad as to be indecent.

#### Utilize Muskeg Vegetation

Edmonton Firm Manufactures Building Insulator Material From Muskeg Litter

Commercial utilization of muskeg vegetation, plentiful enough in Northern Alberta, is seen as an immediate probability following the development of a new building insulator called "Moosetex" by two Edmonton men. An Edmonton lumberman, J. Victor Carlson, and his son Arthur V. Carlson, are stated by the Edmonton Journal to have perfected a process by which ordinary muskeg litter is transformed into fine quality of insulation material. Experimental work is stated to have advanced sufficiently for the new product to be offered to the building trade.

#### Stimulate Fishing Industry

Hon. D. G. McKenzie, Minister of Mines and Natural Resources in the Province of Manitoba, is personally visiting fishing settlements along Lake Manitoba collecting data concerning the problems with which the men engaged in the fishing industry are being faced and to formulate plans for putting the fishing industry on a better basis.

#### Remove all callouses and enlargements from your stock with Douglas' Egyptian Liniment, a wonderful remedy.

Credit For Unemployed

Pending the commencement of unemployment relief works on a large scale in British Columbia, the provincial government has instructed government agents and provincial police in all outlying districts to give all persons who need food, credit of 40 cents a day at local stores. The allowance will apply to women as well as men.

#### British Trade With Russia

Export Credit To Be Extended For a Period Of 30 Months

In a move to increase British exports to Soviet Russia, the British Government announced Thursday, July 9, 1931, through William Graham, president of the Board of Trade, that export credit will be extended for a period of 30 months instead of 24 months as at present.

This arrangement will be limited to heavy engineering products.

The British move has resulted from other European countries, notably Italy, having extended their export credit schemes for Russia to 30 months.

The announcement, made in the House of Commons, disposes of reports in the British press in the last few days that the Labor Government planned to extend a new credit of approximately \$30,000,000 to Russia. It was learned authoritatively that British exports credit arrangements for Russia remain unchanged except in relation to the extension of time limit. The 30-month limit includes the period of manufacture.

#### A Live Stock Safeguard

Restrictions Placed On Importations Of Stock From Countries Infected With Foot And Mouth Disease

With official confirmation of outbreaks of the dread foot and mouth disease in England, Scotland and Ireland, it has become necessary for the Dominion Department of Agriculture to extend the powers conferred upon it under and by virtue of the Animal Contagious Diseases Act, and cancel all permits issued for the importation of cattle, sheep, goats, and other ruminants, and swine from the countries infected with foot and mouth disease. While shipments actually embarked as on the date of the official order, June 20, 1931, will be allowed to proceed to Canadian points, the issue of permits has been held up for an indefinite period.

A pleasant medicine for children is Mother Graves' Worm Expeller, and it is excellent for driving worms from the system.

#### New Serum Discovered

Discovery of a new small-pox serum was announced recently by the British Medical Research Council, reporting the researches of Professor William John Tulloch and Dr. James Craigie. The serum enables a definite diagnosis in early stages of suspected small-pox, when the symptoms are otherwise doubtful.

#### REMNANTS

## New Friendly Relations Established Between France And Germany

Paris, France.—France and Germany have buried their hatchets and relations between the two nations have taken a new start, Julius Curtius, German Foreign Minister, Sunday, July 19, 1931, told the assembled German and French and foreign newspaper correspondents.

"Without violating any proprieties or any duties of loyalty to my French colleagues," the German Foreign Minister said, "I think I can say now, without awaiting the official communiqué which we will agree to later, that the 'Chequers Spirit' has triumphed and Franco-German relations have been placed on a new basis.

"This includes political as well as financial questions."

What was deemed a hopeful feature of Sunday's developments was voiced in a communiqué issued in behalf of both the French and German Governments. That feature was a determination that the two parliaments mark the beginning of a new and fruitful collaboration between the two nations and their firm intention of bringing about conditions leading to co-operation in both political and economic fields.

A negative part of the negotiations, as disclosed by the communiqué, is that financial guarantees and those measures of political appeasement which France wishes Germany to pledge have not yet been agreed upon.

## British Boys Entering Canadian Universities

At Least Twenty-One Are Coming This Year

Montreal, Que.—Practical results of the visit to this country last spring of a group of British public school headmasters is seen in the announcement that at least 21 British public school boys will come to Canada this year to enter Canadian universities. McGill University will have 12 of the boys, Queen's University, four, University of Toronto, three, and one each will go to Guelph and the University of British Columbia.

F. R. W. Crump, Taunton, will study chemistry at British Columbia.

### Periscope Hits

Chicago, Ill.—The periscope hat seems to be on its way here. Sponsors of the Second International Patent Exposition to be held in Chicago starting September 14, said that among the devices to be shown was a periscope designed to fit a man's hat, enabling him to see a hand, should he sneak up behind him.

## Income Tax Amendments Announced In Budget Have Been Withdrawn

Ottawa, Ont.—The income tax changes announced in the "budget" were withdrawn by Premier Bennett in the House of Commons. This applies to all except corporation tax.

To a surprised chamber, the prime minister, in grave tones expressive of strong feeling, declared that in view of personal attacks made on him both in the House of Commons and outside, he must ask leave to withdraw the income tax resolutions. Quoting from a speech made on the budget a month ago by Hon. Fernand Rinfret, former secretary of state and member for St. James, Montreal, the prime minister asserted that Mr. Rinfret had charged him with relieving himself and his wealthy friends of 25 per cent. of their income tax.

Another former minister of the crown, Hon. C. N. Gordon, of Peterborough, continued Mr. Bennett, had made the statement at a public gathering that the proposed income tax amendments would save him (Mr. Bennett) \$25,000 personally.

Both statements were untrue. Mr. Bennett declared he had never been hurt more in his life than by these assertions, one in the House of Commons and one outside, declared Mr. Bennett with some emotion.

Withdrawal of the resolutions does not necessarily mean that similar legislation may not be introduced next year as applicable to 1931 incomes. As a matter of fact, the changes would not have become effective until next year.

The declaration of the prime minister was received with mixed feelings

## Premier Introduces Bill For Pensions

Resolution Provides For Increased Contribution By Federal Government

Ottawa, Ont.—A resolution providing for the increase from 50 to 75 per cent. in the federal contribution to old age pensions has been placed on the order paper of the House of Commons by Rt. Hon. R. B. Bennett, Prime Minister. The resolution calls for an amendment to the Old Age Pensions Act. It reads as follows:

"Resolved, that it is expedient to amend the Old Age Pensions Act by increasing the amount of the payment to the provinces for old age pensions from one-half to 75 per cent. of the net sum paid out during the preceding quarter by such province for pensions, and to provide for the examination and audit of expenditures in the province and the accounts relating thereto."

The increase in federal payment for old age pensions was announced some time ago. This legislation implements that announcement.

## Modifies Restrictions On Canadian Cattle

Strict Regulations Have Been Eased Up By Britain

Ottawa, Ont.—The restrictions applicable to Canadian cattle landing in the United Kingdom have been eased up according to a cable received by Hon. Robert Weir, Minister of Agriculture. The result will be that market range for Canadian cattle in the Old Country will be materially increased and should make it possible to take care of a larger volume of receipts. The greater freedom of movement, however, will have a tendency to create a slower market.

Under the order of the British Ministry of Agriculture, issued June 20, all cattle arriving at British ports were required to be slaughtered immediately at the point of arrival. The cable, however, advises that this restriction has been modified to provide under license for immediate slaughter, to outside points.

## Deportation Figures

3,699 Britishers Departed From Canada In Ten Months

Ottawa, Ont.—Deportations from Canada from August 1, 1930, to May 31, 1931, totalled 4,137, Hon. Wesley A. Gordon, Minister of Immigration, told the House of Commons. The House was in committee of supply considering an item of \$1,905,000 for salaries and contingencies of the department. From April 1, 1930, to the present, deportations had amounted to 4,676. The minister said which 3,099 were British, 279 United States and the remainder foreigners from countries other than the United States.

The department was not now making grants to immigration societies, the minister said. The vote was divided between \$1,055,000 for salaries for the outside service, and \$850,000 contingencies.

### Bomb Found In Vatican

Vatican City, Rome.—Removed from the interior of the church for examination, a bomb exploded early Friday, July 17, 1931, in the garden of St. Peter's Cathedral six hours after it was discovered. It was found last night near a portable pulpit, 50 feet from the great altar where the Pope celebrates the most important occasions. A few uprooted trees was the only damage.

H. E. Spencer (U.F.A., Battle River), expressed the hope that the government would prepare further legislation along the lines of that withdrawn.

Hon. Charles Stewart, former minister of the interior, informed the prime minister that any man in public life was liable to such attacks. Mr. Bennett should not feel too badly.

The tax change withdrawn would have increased the exemptions of the smaller incomes, increased some rates in the middle scale, and decreased the rate on the very high salaries.

Among other things amendments provided that in respect to income for the present year and each year the government had the right at present imposed on individuals be repealed and the following substituted therefor:

"On the first \$1,000 or any portion thereof, one per cent.;

"On the amount in excess of \$1,000, but not in excess of \$2,000, two per cent.;

And so forth down to:

"On the amount in excess of \$24,000, 25 per cent."

The income tax amendments applicable to corporations has already been approved by the House.

## FOR UNEMPLOYMENT RELIEF

Hon. J. A. Merkle, Minister of Railways, Labor and Industries in the Saskatchewan Cabinet, who seeks \$18,000,000 from the Dominion Government to take care of the relief and unemployment in Saskatchewan this year.

## Riding Freight Trains

Railway Officials Take Action To Put A Stop To Free Trips

Vancouver, B.C.—Frequent deaths among transients getting free trips on freight trains, have been responsible for a drive to end this form of travel, according to railway officials. It is unofficially stated that there have been scores of such deaths in the past few months. Sudden shifting of lumber loads and many other eventualities contribute to the toll among the brake rod riders.

This week Canadian Pacific Railway police, co-operating with other forces started a campaign and there have been 20 arrests in various parts of British Columbia for this kind of trespassing.

Another object is to stop indiscriminate movement of unemployed from one part of the country to the other. Railway officials state, too, that many of the travellers are able to pay fare.

Trainsmen have been used to an average number of casual trampers seeking free transportation, but the new tide of traffic has swelled to great proportions and has become unwieldy with impediment. In fact, so much baggage has been piled on top of freight cars that brakemen have difficulty, it is said, in making their way along the catwalks.

## Trans-Canada Flight

First Non-Stop Flight From Halifax To Vancouver To Be Attempted In August

Vancouver, B.C.—The first non-stop flight across Canada from Halifax to Vancouver, will be attempted August 14 by J. Williams, of Ottawa, in the course of a triangle flight, Vancouver, Mexico City and back to Halifax, according to a telegram received by Airport Manager William Templeton. Williams will fly a Lockheed Vega monoplane, capable of a speed of 170 miles per hour. He will leave Halifax at dawn and expects to reach Vancouver about 7 or 8 o'clock in the evening. He will refuel here and take off immediately for Mexico City, hoping on again from that point for Halifax. He hopes to make the 9,000 mile round trip in three days.

### Government Grain Elevator

The Dominion Government grain elevator, under construction at Lethbridge, is expected to be ready for business by September 1, this year.

## Mounties' Monument

Pioneer days in the Canadian West will be re-called on August 1, when notables from all parts of British Columbia and the Prairies gather at Fort Steele, B.C., on the Columbia Valley line of the Canadian Pacific Railway, to attend the formal unveiling of a cairn erected by the Historic Sites and Monuments Board, to commemorate the first Royal North West Mounted Police Fort in British Columbia. It was built in 1887 by Superintendent "Sam" Steele (afterwards Major-General Sir Samuel Benfield Steele, C.M.G., C.B., M.V.O.), with Inspectors E. T. Wood and C. F. A. Hunt. Surgeon F. H. Powell and the men of "D" Division, and was an important factor in securing and maintaining the peace of the newly developed territory. The history of the Mounties is an epic and their work in connection with the construction of the line of the Canadian Pacific Railway to the Coast, is one of its most stirring pages.

754

## Huge Sums Donated To Campaign Funds By Beauharnois Power Co.

Ottawa, Ont.—Contributions to various political campaign funds by R. O. Sweezy and his Beauharnois Power Company totalled about \$950,000. Like a bolt from the blue, evidence to this effect was given before the special parliamentary committee investigating the Beauharnois project.

As nonchalantly as a man revealing his golf score, Mr. Sweezy told of a personal contribution totalling between \$600,000 and \$700,000 to the Liberal party. This was given to Senator Andrew Haydon and Senator Donat Raymond upon the understanding an undefined percentage was to be delivered to the Quebec provincial Liberal party. In addition to this sum, the Capital Construction Fund made a contribution of \$100,000 to the Federal Liberal Party. The Liberal party in Ontario had received "trifling sums," perhaps \$3,000, through W. P. R. Parker, of Toronto, said Mr. Sweezy.

As a personal contribution, Mr. Sweezy donated \$6,000 toward the campaign expenses of Leslie Bell, Conservative member for St. Antoine, Montreal, and to others whom he had been in the habit of aiding in the past. General Eric McQuig received \$1,000 for the Conservative party in Montreal, said Mr. Sweezy, while Jacques Cartier, treasurer of the Conservative party in Quebec, was given \$20,000.

Conflicting evidence was given concerning \$120,000 to John Aldr. Jr., of Toronto, on the understanding it was a contribution to the Ontario Conservative party. Mr. Aldr. contended it was in settlement of a personal act.

## Make Successful Flight

"Justice For Hungry" Monoplane Lands Near Budapest

Budapest, Hungary.—Falling by only a few miles to reach the goal of their approximately 3,200-mile non-stop flight from Harbor Grace, Nfld., to Budapest, Captain Alexander Macdonald and George Endren were forced to land their trans-Atlantic monoplane, "Justice For Hungry," near the little village of Blacke, 14 miles from here.

Their last drop of gasoline exhausted, they landed the ship on rough ground along a railway track at 7:00 p.m. (1:40 p.m., E.S.T.). They had covered approximately 3,000 miles over land and sea in a little over 26 hours, and were almost in sight of the goal when the gasoline tank ran dry. They had left Harbor Grace at 11:15 E.S.T.

Sweden plans to spend \$12,400,000 on highways and city streets this year.

## Test Movements Of Grain From Port Churchill Planned For This Season

Ottawa, Ont.—The grain dealers of western Canada must take the responsibility for any test movement of grain out of the port of Churchill this autumn, Hon. R. J. Manion, Minister of Railways, stated in the House of Commons. The elevator would be in readiness on September 15 for the test movement.

"There has been discussion in the press of western Canada," he said, "as to the quantity of grain that would be handled in this test movement. I have made careful inquiry of departmental officials, and the records have also been searched, and I am unable to find any statement as to quantity of grain to be moved in connection with the proposed test of terminal facilities.

"I am advised by officials of the department who have been constantly in touch with the matter that, in view of the necessity as far as possible to avoid interference with the dredging and construction program, it was never contemplated that more than two or three cargoes should be attempted in this test movement.

"Pending organization of the port next season, any grain moving for export through Churchill this fall will have certain advantages, as no elevator or storage charges, or charges, or pilotage fees will be exacted. Partly due to this it appears probable, from investigations by the department, that grain may be shipped via Hudson Bay, this season, notwithstanding relatively high insurance

count of his with Mr. Sweezy. When pressed for a full explanation, Mr. Aldr. said he had advised Mr. Sweezy on the best way of securing a contract with the hydro-electric commission of Ontario but he could not remember what his advice had been or give any details.

A proposal had been made to him, said Mr. Sweezy, to contribute \$200,000 to the Federal Conservative party but nothing was done about it. Peter White, K.C., counsel for the commission, suggested this transaction was not completed because Premier R. B. Bennett refused to accept the money. Mr. Sweezy did not know why it fell through.

Both Mr. Sweezy and Mr. Aldr. denied making any personal contribution to Hon. G. H. Ferguson, Canadian High Commissioner in Great Britain and formerly premier of Ontario. No contribution had been made to the Conservative party of Manitoba, said Mr. Sweezy.

No contributions were made to the Progressive groups' funds or to Progressive members. Mr. Sweezy told the committee.

Far-reaching repercussions may develop from the campaign fund evidence. Senator Donat Raymond, named by Mr. Sweezy as receiving some of the money for the Liberal party, will be recalled to the stand. Senator Andrew Haydon, also named in this role, has been ill for six months with heart trouble, but Hon. W. A. Gordon, chairman, will confer with his doctors in an effort either to have him brought before the committee or have his evidence taken at his home in Ottawa.

## Request For Wheat Board Is Refused

Prairie Premiers Advised Of Decision Reached By Government

Winnipeg, Man.—The Dominion Government has turned down the request of the prairie premiers for a wheat board. Premier John Bracken of Manitoba, disclosed that the premiers had received a letter from Premier R. B. Bennett advising that the Canadian Government does not see its way clear to set up the proposed prairie-wide board.

The letter from Mr. Bennett, Mr. Bracken admitted on questioning, made the suggestion of an inter-provincial body "somewhat similar" to that forecast in reports published here. It had been reported that the Ottawa suggestion was for a commission, headed by John I. McFarland, head of the Pools' Central Selling Agency, to control the Pools' elevator systems and to market their grain.

### Test Movements Of Grain

rates, as cheaply as it can be shipped to Europe through present recognized channels. On this basis, the department has endeavored to interest the western grain trade in the proposed movement, so far without success, due probably to the demoralized state of the grain trade owing to world conditions.

"The government has fulfilled the implied obligation of its predecessors, and will have the terminal facilities at Churchill available on the 15th of September as planned. The railway, the dock, the elevator, and the necessary aids to navigation have been provided.

"Vessels will not proceed to Churchill to load grain unless grain is sold abroad for delivery via that port. The matter is thus in the hands of the grain exporters. It is no part of the business of the government to undertake the purchase and sale of grain for movement via Churchill, any more than for movement via any other Canadian port. If the test movement is to take place, the responsibility is, therefore, on the grain dealers of western Canada.

"The facilities will be available." Dr. Manion concluded, "and, if the grain interests are not in a position to take advantage of the opportunity to give them a practical test after September 15, it will be necessary to postpone the handling of grain through Churchill until the formal completion of work next year."

**NOTES AND COMMENTS**

The heat tempts one to slow up in their daily work. The easiest thing in the world is to take the line of least resistance. Because so many follow it, there is always room at the top for the aggressive fellow who, no matter if it be hot or cold, sees that he does his "daily dozen" without hindrance.

Were we to follow our inclination, we would seek a cool shady spot and stay there till September morn. The trouble is that were we to do so, we might have the sheriff awaiting our return, as a newspaper must be published each week if it is to continue to live.

If we all could work for ten months and have a two months vacation it would be ideal. Possibly it will come to that if work is to be evenly divided so that everyone who is out of a job will have a chance to earn a living.

There is a tragic side to unemployment, most acute to those who not because of their own fault, but because of the financial collapse, are unable to find work. Many who formerly held "white collar" jobs, for which they were trained as is the mechanic for his trade, have had to go on relief work at manual labor. As the country at large must bear the cost of either finding work or food for the unemployed who are willing to work, it naturally follows that the most reasonable method is to raise the necessary capital backed by the credit of the entire nation and embark on public works of a useful nature. This condition now existing will not right itself.

The Beauharnois enquiry reveals the most sensational scandal since the famous Pacific scandal in the time of Sir John A. McDonald. In return for political influence, nearly a million dollars were given away by the president of the Beauharnois company. This company intended to float a bond issue for fifty million dollars to develop a project for generating electric power from the water of the St. Lawrence river. Revelations of the past week will be sufficient to create grave misgiving in the public mind. No cautious investor will care to buy bonds in a company which has already shown such a mass of corruption in its initial stages. The repercussions that will follow will be most damaging to prominent politicians, especially those of the Liberal party in Canada. Such startling revelations show graft and corruption in high places which is a blot on men's reputations. E. J. Garland, M.P., one of Alberta's U. F. A. representatives, certainly stirred up a nice mess and has shown that an independent political party which was not included on the graft list can perform a useful service in the public interest. Front page news—indeed! Something to make everybody sit up and take notice. It is a mighty good thing that under a system of democratic government these huge conspiracies to flim-flam the public cannot be kept under cover indefinitely.

\$150,000 as a gift to Sir John Aird's son—son of the president of a leading Canadian bank, and a hungry boy of less than 20 years given six months for stealing two pies. What a contrast to be proud of! It is sufficient to cause the common people to rise in public indignation.

Many business men in small towns do not appreciate the value of tourist business. To the individual tradesman it may be very little, but multiply it thousands of times and this increased business is as good as hundreds of thousands of dollars in export trade. Figures issued by the Department of Trade and Commerce state that the tourist business represents to Canada \$300,000,000 annually. Coleman has among its business men those who are so short-sighted as to state that it is not worth while spending any money or making an effort to provide inducements for tourists to remain here for a brief stay. In the meantime dollars are passing by our doors in the summer time because no effort is supported whereby general business might be increased. Other places with business men of keener vision and who do not hesitate to put forth some personal effort reap not only their share of the increased business which the tourist brings, but they also get the share of those towns which are so self-centred that they see nothing beyond the front doorstep.

Providence has a peculiar way of using the meannesses of mortals for the benefit of the victim, and also of making our kindest actions to bring disaster. Hardly a person has not undergone an experience of this nature. It helps us to form just estimates of men and their purposes, though very trying when one suffers under the injustice of such actions. But, remember the old saying, "The wicked shall flourish like the green bay tree." 'Tis hard for mortal minds to divine the wisdom of the rulings of Providence.

**Here and There**

Annual value of forest products in Canada is placed around \$600,000,000 by the Canadian Government Forestry Service, and over 200,000 persons are employed in this work.

Total value of crude bullion gold in Ontario for the first two months of 1931 is placed at \$4,517,254 as compared with \$5,352,395 for the same period of 1930, an increase of nearly 22%. This continues, all previous records of gold output are likely to be exceeded this year.

Position of president of the Boy Scouts Association of Canada, has been offered to and accepted by E. W. Beatty, chairman and president of the Canadian Pacific Railway, whose interest in boy welfare has long been recognized all over the Dominion.

John Minard, section hand with the Canadian Pacific Railway for many years and pensioned at the age of 73, celebrated his 105th birthday April 2. He does not use glasses, eats well, sleeps well and enjoys life. He has no prescriptions for exceeding the century mark.

Sponsored by the Alberta Motorcycle Association, the Western Canada Motorcycle hill-climbing championships will be decided at Banff in the Canadian Rockies on May 24 and will be followed the same day by the Banff annual regatta.

A shipment of \$60,000 salmon eggs has recently been forwarded to the Dominion Fish Hatchery at Flat Lands, Restigouche County to seed trout for sale to be deposited in the Nipisiguit River as a part of the 1931 programme for restocking New Brunswick fishing waters.

Canadians, from coast to coast, heard the voice of His Excellency the Governor-General and Rt. Hon. R. B. Bennett, the Canadian Minister of the Dominion, May 11, in endorsement of the work of the Canadian Red Cross through stations linked by the radio broadcast transmission system of the Canadian Pacific Railway Company's Telegraphs.

In the last analysis the railroad safety movement's success is traceable largely to teamwork. Each railroad worker is constantly reminded that safety is paramount. Safety practices have become habitual, therefore they do not lessen efficiency. Railroad passenger service is now more efficient as well as safer than ever before, says a prominent United States newspaper.

The new 6 1/2 hour service between Montreal and Toronto, both ways, which came into operation on Canadian Pacific lines end of April, proved highly popular with travellers, and heavy traffic on these trains is reported. Ottawa has also been brought half an hour closer to Montreal and passengers for Quebec have had 15 minutes clipped from the time of the journey.

Popularity of the reduced weekend fares which went into effect May 1 on all Canadian Pacific lines has been the start, according to reports from traffic officials of the railway. They represent a saving of approximately 25% to the travelling public with reduced fares available from noon Friday to noon Sunday and return portions up to midnight of the Monday following. (740)

"Buyers' Week," which has been a great success in the past, will be held for the fourth time in Montreal commencing August 10 next. At the last one in February upwards of 1,100 buyers came to Montreal and purchased in round figures \$950,000 worth of Canadian-made goods.

A man catching a fish is not news unless the fish is an outsize, but a fish catching a man rates a big type head. This happened at Lake Minnowwaka, near Banff, recently, when an angler, who was pulled off the pier into the lake by the sudden strike of a monster trout. Constable James of Calgary put off in a boat and landed both fish and fisherman.

Six days, nine hours and eleven minutes was the time of the record run of the "Empress of Japan," 80,000-ton flagship of the Canadian Pacific fleet, on her last trip from Yokohama to Honolulu, while a double record was made when the same ship completed the voyage from Honolulu to Victoria in four days, nine hours and 18 minutes.

For the second time in the past three years, Canadian Pacific Railway police are all-Canada revolver champions. The railway's Ontario team defeated Royal Canadian Mounted Police, of Lethbridge, in the final for the trophy recently. The railway police scored 1410 out of a possible 1600 against the Mounties 1352 thus becoming Dominion Open Revolver Police Champions.

Hon. Gordon S. Harrington, Premier of Nova Scotia, and two hundred of the province's leading citizens, gathered at Yarmouth June 16 for the opening of the Lakeside Inn, Canadian Pacific hotel. This hotel is the third of a chain across Nova Scotia opened by the railway in the past few years, testifying to the faith in the tourist possibilities of the province held by the Canadian Pacific. # Brief Outline Of Regulations Governing The Admittance Of Tourists To Canada

An outline of Canadian regulations governing admittance of tourists may be of timely interest. A non-resident, visiting Canada for purposes of touring permit for his automobile for health or pleasure, may obtain a period not exceeding sixty days without bond, which may be extended for another thirty days on making application to any Collector or Sub-Collector of National Revenue, and satisfying him as to the bona fides of the applicant as a tourist. If the visitor desires to extend the period to six months he may do so by giving a bond.

Under revised regulations guns, rifles, fishing tackle, golf clubs, cameras, etc., previously used by a tourist, and brought in for his personal use and actually in his possession at the time of his arrival in Canada, together with dogs and other animals imported for hunting purposes or as pets, are admitted without deposit, the only requirement being that they should be reported at Customs on arrival at the frontier, in accordance with the regulations.

The term "cameras" includes not only still picture cameras, but motion picture outfits, the property of bona fide tourists, brought in for their own use for a temporary period, and not for any business or commercial purpose.

Canoes, outboard motors, tents, camp equipment, phonographs, radios, musical instruments, etc., brought in for a tourist's personal use, and not for gain or hire, are admissible upon a sum being deposited equivalent to the duty and taxes payable on the goods, each deposit being subject to refund upon identification and exportation of the articles under Customs supervision within six months from time of entry.

"Statements circulated in the United States that servants of American tourists and visitors to Canada are not being allowed to enter the Dominion this year are absolutely untrue," states Hon. W. A. Gordon, Canadian Minister of Immigration and Colonization. "American tourists and visitors have always been allowed to bring their servants into Canada and they may continue to do so. The only persons likely to find any difficulty in crossing the International Boundary are aliens who are in the United States illegally or in that country under temporary status, as the question of re-admission to the United States would arise, should they try to return there."

Hon. Mr. Gordon said that Canada extends a cordial welcome to bona fide United States citizens coming to Canada as visitors and tourists, and Canadian Immigration officials at International Boundary points are instructed to facilitate their entry to the Dominion.

## The Tourist Industry

Paid \$43,000,000 In Revenue To The Government Last Year

Canadian motorists and visiting United States tourists travelled over nine billion miles of highways in Canada last year, used approximately half a million gallons of gasoline, and paid a direct revenue to the provincial governments in the form of gas tax, auto and drivers licenses, aggregating nearly \$43,000,000. These figures, says a statement issued by the Dominion Department of Trade and Commerce, indicate the important rank the automobile and petroleum industries hold in the economic life of Canada.

Automobile registry in Canada last year numbered 1,339,888 vehicles of which 1,047,494 were passenger cars. These figures indicate there was one vehicle to every eight persons in the Dominion.

Another good thing about radio concerts is the lack of encorés.

"I have known you such a long time, and this is the first time you have ever danced with me!"  
"Yes, it is Lent, and I am denying myself pleasures!"—Moustique Charlier.

W. N. U. 1929

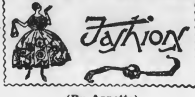

## Silver Fox Breeders

Annual Meeting Held At Summerside, With 400 Members In Attendance

Approximately 400 members of the Canadian Silver Fox Breeders' Association, representing nine provinces of Canada, and other countries, assembled recently at Summerside, P.E.I., for their annual meeting. The presentation of the directors' eleventh annual report showed that during the past year the membership reached a total of 6,538, an increase of 822.

During the last inspection season 30,616 puppies were marked by inspectors and 9,323, the largest number in history, were examined. The number transferred during the year was 28,943, also a high mark. The number of pets consigned to the marketing department showed a healthy increase, numbering almost 22,000, double the number recorded the previous year. Special auction sales held in Montreal for the South American market and in Paris and London, England, for the European market were dealt in with the report.

## Winnipeg Newspaper Union

(By Annette)

## CAPE LENSES CHARM AND YOUTHFULNESS

You'll like this slender model immensely. It's a lovely patterned crepe silk in smart red and white coloring. The low placement of the circular skirt flaring to the hemper part of the dress in diagonal outline gives the figure a charming lengthened line. The narrow tie-belt holds the dress snugly to the figure at the natural waistline. Being adjustable, it may be worn at a point as best suits its wearer.

The miniature view shows how utterly chic it is with cape collar. Lovely fabrics for its development are chiffon prints, pastel flat washable crepe, shirting silk, cotton mesh, and linen.

Style No. 829 is designed for sizes 14, 16, 18, 20 years, 36, 38, 40 and 42 inches bust. The 36-inch size requires 3 1/2 yards of 38-inch material with 2 1/2 yards of ruffling.

Price of pattern 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

## How To Order Patterns

Address: Winnipeg Newspaper Union, 175 McDermott Ave., Winnipeg

"My husband and I attend to our budget every evening. It is more economical."

"How so, dear?"

"By the time we get it balanced it is too late to go anywhere."

## Ridiculed For Using Ancient Wooden Plough

But Farmers In Sussex, England, Know What They Are About

Although ploughs, like other agricultural implements, have been subjected to many alterations and improvements in the course of centuries, it is remarkable at least that in some parts of England the most popular pattern of plough is still one which can differ but little in its general character from the very first implement of the kind that was ever invented. In Sussex and Kent, England, the old wheeless, turn-wrist plough is still very much in favour, and there is a very good reason for its popularity. On heavy land any sort of wheel except that of a wide and necessary cumbersome type cannot be of much service because it tends to dig into the ground when the soil is wet and causes the plough to "jump" when the surface is hard and dry. Sussex ploughs of this kind are invariably made of wood, there being practically no iron about them except the shoe on the tip of the share and the necessary nuts and bolts. The wooden share has the advantage on heavy land that it does not smear the soil in the furrow like a wholty iron share, but tends to break it up. The Sussex farmer has often been held up to ridicule for his persistence in retaining the wooden plough, but we may take it that he knows what he is about.

## Empire Marketing Is Becoming More Popular

Annual Report Of Board Shows Trade Is Increasing

The world-wide economic depression has not arrested the growing habit in the United Kingdom of buying within the Empire.

The annual report of the Empire Marketing Board reveals that apples from Canada and New Zealand reached a record quantity in the past year, those from Canada exceeding two million hundredweight, against a previous record of 1,889,000 hundredweight in 1923. In 1930, 64,000 hundredweight of Canadian peaches were imported as compared with 60,000 in 1928.

Parliament has been asked to provide \$3,295,000 for the board's activities during the coming 12 months. The policy of making grants for scientific research work both here and abroad is being continued. Among grants already made are sums for the University of British Columbia for research on cheese ripening and research on the cost of transport of pedigree livestock; to the Ontario Agricultural College at Guelph in connection with egg production; and to the Newfoundland Government for fishery research.

## Edmonton Exports Butter

Fifty-Six Tons Shipped To The Liverpool Market

Edmonton recently re-entered the export butter market with the shipment of fifty-six tons of creamery butter from the Woodland plant in Edmonton to Liverpool market via the Canadian National and Blue Star lines over the Panama route in special refrigeration equipment. It is expected that the two carlots of one thousand boxes each will be followed by a second shipment in August via the Panama to Glasgow market.

It is five years since Alberta was forced to retire from export markets in the Orient for lack of surplus, but E. T. Love, managing director of Woodland Dairy, will send one thousand boxes to Shanghai soon.

Production for the first half of 1931, in all Alberta, has increased 48.3 per cent. over same period last year with the output to date 6,775,000 pounds for 26 weeks.

Three scientists in France have discovered that a common Paraguayan plant, known as "kaabe," contains 300 times more sugar per gram than sugar cane.

## Valuable Tree Destroyed

Diamond Willow Rooted Out By Land Clearers In West

Growing in sections of the west is a valuable species of willow called the diamond willow, which is being destroyed in bush fires along with the ordinary brush willow. In clearing the land to provide more acreage for wheat raising, this valuable species is rooted out.

The reason for this is that few people know the diamond willow when they see it. The distinguishing marks are so cleverly hidden under the bark that only a close observer would notice them. When the bark is trimmed away a diamond shaped spot is seen, sometimes oblong or nearly square, singly or in clusters.

There is a noticeable awakening to the possibilities of this tree in the making of furniture. A beautiful diamond willow settee has been placed on exhibit at the Edmonton Technical School to arouse the interest of the boys in the wood working department. Diamond willow furniture is also being sold by a large store in Edmonton.

## The Old Fashioned Patten

Was Still Used In Some Parts Of England Half Century Ago

A writer's description of the English people "walking dryshod with iron machines on their feet," has puzzled many readers whose memories do not go back half a century. The description, no doubt, applies to the patten and consisted of a wooden sole, attached to which by short iron legs was a metal ring, oval in shape, which raised the feet two or three inches above the road, and thus kept them clear from wet or mud. They were still in fairly common use in some parts of the country half a century ago.

Not long ago, a correspondent read a notice in the church porch at Trent, near Yeovil, which said: "All persons are requested to take off pattens and clogs before entering the church."

## Alberta Fox Farms

Two Hundred and Three Fox Farms Are Now Located In The Province

Addressing the annual meeting of the Alberta Silver Black Fox Breeders' Association in Calgary the other day, Benjamin Lawton, Alberta's egg pool. This is the first export shipment of eggs since 1929. It will be the first of several shipments this year. Prices in the Old Country are said to be fair.

## Prince Has New Sport

The Prince of Wales has taken up a new sport—motorboating. He has ordered two new racing boats, but the manufacturer of the craft said the prince will not content in open races but probably will organize competition among his flying and motor friends.

A fire engine of German invention pumps streams of carbonic acid powder that smother flames instead of using water.

## "Is Bernice happily married?"

"Yes, indeed, her husband's away most of the time."

## PERFORMS UNUSUALLY WELL AT ROYAL AIR FORCE PAGEANT

The Royal Air Force Pageant produced annually by Britain's fighting air force, once again proved a great success and was a feast of thrills for the hundred thousand spectators. This picture shows the queer, fish-like "Pterofact," one of the quaint machines which took part in the Pageant. It has a speed of 110 miles an hour, carries three passengers, has no tail, and has the engine and propellers behind the pilot. One of its best qualities is that it is foolproof.

# Steamship Beothic Is Again Starting On Annual Trip To Posts In Arctic Archipelago

## Work Up To Schedule

Charlton Will Be Ready For Grain Shipments This Fall

Preparations are going along satisfactorily for the trial shipments of grain this fall out of Charlton. The ice-breaker N. B. McClennan, left Quebec recently to take up her duties along the route and the work on the port facilities is well up to schedule.

No official announcement has yet been made as to the terms under which the test shipments carrying between 600,000 and 750,000 bushels of wheat will be made.

The understanding is, however, that because of the route being new, the insurance rates consequently high, and the trips being of a special nature as far as the ships participating are concerned, the charges per bushel in the ordinary course would be somewhat higher than via Montreal.

The government, it is expected, will be prepared to assume the additional costs for these shipments so that it will not cost the shipper any more than the Montreal route.

Consideration is being given, according to reports, as to who will be the shippers. Some companies with trademarked wheat products are said to have applied for permission to ship the first wheat by the port, but that the government does not take kindly to the trials being used to advertise any particular company. So far, according to reports here, none of the big shippers or the pools has made a decision in the matter.

The insurance rates announced from Regina, are the same as those made public by the Department of Marine in May. Hopes are expressed that after the trial shipments have been made and there is more tangible evidence to go before the shipping commission with, lower insurance rates will be obtained.

## Good Canned Goods

Government Commercial Inspection Service Ensures Uniform Quality

Summer is the season in which the camper and tourist hold sway throughout the length and breadth of the land. It is also the time of the year when, perhaps more than at any other, canned goods are in demand. It is during this season that the travelling and camping public come to realize the true worth to them of the commercial inspection service supervised by the Dominion Branch of the Dominion Department of Agriculture. Under this service all canned products of field, orchard and farm are put up under close inspection, and each individual container in addition to conforming with a specific size must be clearly marked with the true quality of the product it contains. There are three grades of quality defined by statute. These are—"Fancy" which is the highest grade and as nearly perfect as possible; "Choice" which, while not quite so perfect in appearance, is, as the term implies, a real good quality for the product; and "Standard," for use where appearance is not the principal consideration, and which provides high food value and good flavour at little cost.

## A Fallacious Opinion

The St. Thomas Times-Journal recently published a timely editorial pointing to the fallacious opinion held by so many people that the best of surgical attention and nursing care is found only in the largest cities of the continent. The St. Thomas paper puts in a word for the smaller hospitals like those in its own city, and also gives credit to the surgeons who are doing just as fine a work in their own small communities, as are the men of great reputations in the metropolitan centres.

The S.S. Beothic carrying the Department of the Interior's 1931 expedition to the posts in the Arctic Archipelago will sail from North Sydney, Nova Scotia, on July 29. The date of this year's sailing is practically the same as last year's and from experience it has proved the most satisfactory for the carrying out of the work of the patrol.

This year's expedition by officers of the North West Territories and Yukon Branch will be in charge of Major L. T. Burwash, an Arctic explorer of long and wide experience. Captain E. Falk will again be ship's master while Captain J. D. Morin will be the ice pilot. Dr. L. D. Livingstone, Medical Health Officer of the Branch will be ship's doctor on the voyage as far as Pangnirtung, where he will replace Dr. H. A. Stuart, who has completed a two year period among the natives of Baffin Island. Dr. Stuart will act as ship's doctor on the return voyage.

Inspector A. H. Joy and four constables of the Royal Canadian Mounted Police will accompany the expedition to effect changes in the personnel at the posts visited. Members of the force who have completed their tour of duty will be relieved. Two of the constables going North will remain at Pond Inlet at the northern end of Baffin Island, another will relieve one of the two stationed at Bache Peninsula, Ellesmere Island; and the other will replace a constable coming out from Lake Harbour, southern Baffin Island.

The date of sailing as last year will be followed, with the first call being made at Godhavn, Greenland. The "Beothic" will then be headed north along the Greenland coast for the farthest north post of Bache Peninsula on Ellesmere Island. By following this route much time is saved and the dangerous middle ice pack of Baffin Bay is avoided.

On the return trip the first stop will be made at Dundas Harbour, Devon Island. Although not yet definitely decided, it is possible that after completing the work at this post, the "Beothic" will return westward into Lancaster Sound to attempt to reach Winter Harbour, Melville Island, to re-provision the cache established at that point by the 1908-09 expedition. Last year heavy ice conditions prevented the "Beothic" from reaching Winter Harbour.

It is decided to make this patrol, caches will be laid out on Melville Island off the southwest corner of Devon Island, and at Cape Cockburn, Bathurst Island. These will be for the use of Royal Canadian Mounted Police patrols and others travelling in the area.

Returning eastward to Baffin Bay, the ship will call at Pond Inlet, River Clyde, Pangnirtung, and Lake Harbour. Baffin Island; Chesterfield, Hudson Bay; and Port Burwell, Hudson Strait. The work of re-provisioning the posts and effecting changes in the personnel will then have been completed and the "Beothic" will turn southward for the final leg back to North Sydney.

## Modifies Ban On Motor Cars

Bermuda Will Allow Motor Ambulances To Be Operated

The Island of Bermuda has further modified its ban on motor cars to the extent of allowing two automobile ambulances to be operated. The Bermudian government decided to relax its stringent law pertaining to motor vehicles as a result of an accident to the horse-drawn ambulance while it was rushing to remove fire-fighters overcome aboard a burning hotel. Because of this mishap private carriages had to be commandeered to remove the fire fighters suffering from the smoke and intense heat. At one point during the fire twenty men were lying about waiting for ambulance.

The Chilean government has announced that it will avoid a budget deficit.

"How much is that canary?"  
"Two pesetas."  
"Can't you let me have it cheaper?"  
"No, my dear. The factory price."—Ben Humor, Madrid.

Film Actor: Look here, if he's going to throw me into the rapids, how am I going to get out?"  
Director: "Oh, that's all right. You don't appear again!"—The London Opinion, England.

## WORLD HAPPENINGS BRIEFLY TOLD

Eight Russian army officers were killed in an airplane accident near Alabino, 30 miles west of Moscow.

Edmonton land sales for the first quarter this year amounted to \$15,000 more than for the same period last year.

In Parliament Prime Minister Bennett said he did not expect to hold the position of Finance Minister at the next session.

Air mail contracts of which expiry notices on July 15 were issued by the post office department several weeks ago, have been extended until August 15.

Charles A. Lindbergh has been granted permission by the radio commission to operate a transmitter aboard his airplane on his projected flight to Japan.

Tute factories in Dundee, Scotland, are at work making a million sugar sacks. The sacks have been ordered by the government and are to be completed by December.

Organization of self-contained labor camps in the north of Canada was proposed in a resolution passed at Hamilton by the central branch of the Canadian Legion.

Announcement is made of the appointment of Lieut.-Gen. Arthur G. Wauchop to be high commissioner in Palestine, succeeding Sir John Chancellor, who recently resigned.

Appointment of H. E. Berford as assistant director of surveys for Manitoba and Alfred Bedford Howell as chief game guardian have been officially announced by orders-in-council of the provincial government of Manitoba.

## Strange News From Holy Land

\$2,000 Horse-Power Plant To Supply Electrical Energy In Biblical Towns

Here is strange news from the Holy Land. The first hydro-electric plant on the River Jordan south of the Sea of Galilee will soon be in operation. It was built partly by American capital and by next year its \$2,000 horsepower plant will be supplying current to such Biblical towns as Jaffa, Haifa, Nazareth and Beersheba. Meanwhile the British are building a generating plant that will supply Jerusalem, Bethlehem and the surrounding region. Before long the mountain streams of Lebanon will be producing 51,000 horsepower—World's Work.

## Barley In Canada

Barley is the staple of all cereals and can be grown through a greater range of climate than any other. Its production dates from the most ancient times when it was used principally as an article of food, but as the years progressed the uses became varied. The production of barley ranks third among the cereal crops of the Dominion in acreage and total yield and second in average yield per acre.

Preserving Our Scenic Wealth  
To preserve some share of the primeval places of the land in their primeval condition is the object of the National Parks of Canada.

"We will be married on Saturday." "Impossible. I am playing football that day."—Buen Humor, Madrid.

W. N. U. 1899

## SUNDAY SCHOOL LESSON

JULY 26

### CHRISTIANITY SPREAD BY PERSECUTION

Golden Text: "Be thou faithful unto death, and I will give thee the crown of life."—Revelation 2:10.

Lesson: Acts 7:54 to 8:4; 11:19-21; 26:9-11; 1 Peter 4:12-19.

Devotional Reading: 1 Peter 1:3-9.

### Explanations and Comments

The First Christian Martyr, 7:54-60; 8:2.—How challenging is the fortitude and grace of Stephen! In the strength of his vision of the heavens opened and of the Son of Man standing on the right hand of God, he could meet hatred and even death with a serene and courageous spirit. How his quiet demeanour contrasts with the ruthlessness and hatred of the mob, who grind their teeth in fury, scream, rush upon him, drag him without the city walls, and stone him.

When the stoning began, Stephen knelt to pray for power faithfully to endure to the end, or it may be as the stones hurled upon him, and was thrown to his knees and was in this position as he prayed. As the stones came thick and fast like his Master, he prayed for those who stoned him. "Lord, lay not this sin to their charge, but do place not this sin in Thy balance against them. At once, we think of Christ's prayer from the cross, 'Father, forgive them, for they know not what they do.'"

"In our lives we need Stephen's steadfast courage, and his clear-eyed faith, and his heaven-piercing hope, and his God-like charity."  
And when he had said this, he died, or, as it is beautifully expressed here, "he fell asleep." And devoutly he buried him, and made great lamentation over him, beating their breasts as a sign of their grief. It took courage to perform this kindly act for Stephen, even if most of the mad mob had departed to their homes, leaving the care of a young man named Saul. He is first called Paul in Acts 13:9.

And Saul was consenting unto his death, approving all that was done. In Acts 22:20, Paul himself says, "And when the blood of Stephen, Thy witness, was shed, I also was standing by and consenting."

Paul's Part In Stephen's Death, Acts 8:1.—What a witness to the stoning of Stephen laid aside their flowing robes in order to have freer access to the place of execution, the care of a young man named Saul. He is first called Paul in Acts 13:9.

And Saul was consenting unto his death, approving all that was done. In Acts 22:20, Paul himself says, "And when the blood of Stephen, Thy witness, was shed, I also was standing by and consenting."

The Scattered Christians Preach Everywhere, Acts 8:4.—The apostles to a great fire by kicking the embers apart resulted in a new fire blazing up where each ember fell. Hitherto the apostles had done the preaching. At the time of the appointment of the seven deacons, the apostles had declared "we will give ourselves continually to the ministry of the word." But all believers are preachers by persecution went everywhere preaching the word. They probably did not teach the truth at first in any set form. Simpson says, they went "gossiping the gospel." As they sought shelter in the villages and towns, in explaining why they were there, they would tell the story of the gospel. This brought to the surface latent talent and those gifted began more formal preaching. In this way, the preaching of the truth came to be exclusively an apostolic function.

### Communicating With Planets

Nicola Tesla Discovers Means Of Transmitting Energy From One Planet To Another

Nicola Tesla, the inventor, in an interview on his 75th birthday, said after years of research he had discovered a means of transmitting thousands of horsepower of energy from one planet to another, which he believes will open the way for inter-planetary communication.

"I feel," he said, "that we are nearing a period when the human mind will perform greater wonders than ever before. This is due to the continuous refinement of means and methods of observations and the ever increasing delicacy of perception."

### Scotland's Population Is Less

Preliminary census returns for Scotland show a fall from 4,882,000 in 1921 to 4,842,000 now. This is the first time a decrease in Scotland's population has been officially recorded, and migration is given as the reason. Gaelic speakers number 137,000 of which 7,000 cannot speak English.

"Keep hold of the cord of laughter's bell,  
And avoid the tones that jar;  
The sound of a sigh doesn't carry well,  
But the lift of a laugh rings far."

Elliptical refrigerating plants are to be built in Italy.

## Passing Of Trader Moberley

Was Link With the Very Early History Of the West

H. J. Moberley, better known as "Trader Moberley," is dead. Apparently in good health, Mr. Moberley was walking about a few days ago. He came after a very brief illness, death being attributed to old age. Mr. Moberley being 86 years of age at the time of his death.

Known internationally for his book, "When Fur Was King," Mr. Moberley is believed to have been the only remaining commissioned officer of the old Hudson's Bay Company. He served the company from 1854, when he came west with Sir George Simpson, then governor of the company, till his retirement in 1894, when he was factor at Ile a la Crosse Post.

Born in Barrie, Ontario, Mr. Moberley was the son of a noted captain in the British navy. His father fought in the war of 1812. Prior to joining the Hudson's Bay Company, Mr. Moberley was employed by the famous British firm of Lloyd's and in their service he visited Havana, Cuba, and St. Petersburg, Russia.

He commenced his service with the Hudson's Bay Company as clerk at Norway House under Chief-Pactor Rowland. Edmonton was his first post and afterwards he was moved to Rocky Mountain Post, later opening up Jasper House as a trading post for his company.

He also at one time was in charge of the posts at Fort Vermilion and Peace River, and established the Fort McMurray post in the early 70's. He was in charge of transports at Portage la Poudre and carried despatches to the Earl of Southesk in 1859 when the Earl engaged in a hunting trip through Canada. Prior to taking charge of the Ile a la Crosse Post, the veteran trader was stationed at Stanley Mission on the Churchill in northern Saskatchewan.

## Houses Good Sized City

Thousands Work Or Live In Empire State Building, New York

One of the biggest houses in the evergrowing world is the Empire State Building of New York. It is a huge structure of steel and bricks and is 86 stories high. About 25,000 people live or work in it. There are 58 passenger lifts for the 86 stories and three kinds of express lifts. Some of these lifts run at a speed of 15 miles an hour. The passenger goes up to the nearest stopping floor to his and then transfers to a slow lift which stops at every floor. Here again, however, he can make the last part of his journey on an escalator, of which there are nearly a hundred. Six lifts entirely for goods are always in busy use.

## Use Plans To Locate Minerals

The aeroplane will be employed by Professor J. B. Mawdsley of the University of Saskatchewan in locating and charting mineral resources in Northern Saskatchewan. Investigation of areas of schist and gneiss stone presenting favourable prospects for metallic minerals will be made.

In catfish families, the father fish assumes the care of the young.

## Recipes For This Week

(By Betty Barclay)

### LEMON EGG-NOG

(Serves 1)

- 6 tablespoons milk.
- 1/4 cup cold water.
- 1 egg.
- 2 tablespoons sugar.
- 2 tablespoons lemon juice.
- Grated nutmeg.

Combine milk, water, egg and sugar. Beat thoroughly, pour in lemon juice and mix vigorously. Serve in a large glass topped with a grating of nutmeg.

### HONGKONG CHICKEN

- 2 cups cold cooked chicken, diced.
- 1/2 cup celery, diced.
- 2 onions, sliced.
- 1/2 cup crushed pineapple, drained.
- 1 teaspoon sugar.
- Salt and pepper.
- 1 tablespoon butter.

Brown the celery and onions in the butter. Add the other ingredients. Heat well. Serve with fried noodles.

### Manitoba Gold

Province Likely To Replace Yukon As Fourth Producer In Canada

Gold production in Manitoba for the first four months of the year exceeded the total output for 1930 by a substantial amount, and at the present rate of production the province is likely to replace the Yukon as the fourth producer in all Canada. Manitoba's gold output for the first four months of 1931 amounted to \$5,928 ounces valued at \$739,540, or at a rate well in excess of two million dollars annually, as compared with an output of 23,189 ounces valued at \$479,359 for the whole of 1930.

More than \$8,000 was collected in one day recently in Edinburgh for the Scottish lifeboat fund.

## Funds For Alberta

Settlement Of School Lands Case Is Satisfactory To Province

Close to ten million dollars in provincial assets, with nearly a half million a year in interest for three years, will be coming to Alberta as a result of the settlement of the school lands funds case. Hon. R. G. Reid, provincial treasurer, has been advised from Ottawa that the Dominion Government has issued a three-year debenture for \$9,564,569, bearing interest at 5 per cent. until July 1, 1934, payable half-yearly.

The debentures thus issued to Alberta's credit represents accumulated principal moneys from the sale of school lands since the organization of the province in 1905. All funds from this source have heretofore been handled by the Dominion, which has retained the principal and paid interest to the province. With the transfer of the Natural Resources from Dominion to Provincial control, the school lands funds now pass to the province as part of the public domain.

Negotiations leading up to this settlement have been under way for a considerable time past. The conclusion now reached is regarded as highly advantageous to the province, and both Premier Brownlee and Treasurer Reid express themselves as well pleased with the outcome.

### Worked In A Circle

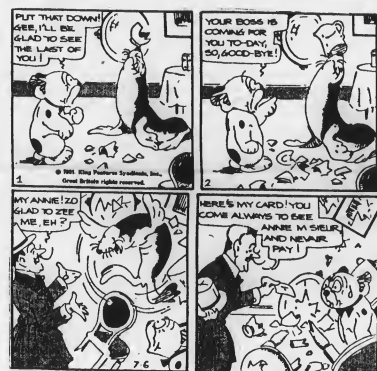

Teacher—"Why are days longer in summer than in winter?"  
Tommy—"Because the sun shines longer."

Teacher—"Yes, but why does the sun shine longer?"  
Tommy—"Because the night is so much shorter."

Cob is an old name for spider, hence the origin of the name cobweb.

Baseball is popular in Argentina this year.

# WINDOLITE

### THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness, but 36 inches wide only.

Distributors: CHANTLER & CHANTLER LIMITED  
51 Wellington St. W. - - - - - TORONTO, ONT.

### Try BORDEN'S Chocolate Malted Milk at lunch time

Many a tired business man has found that a glass of Borden's Chocolate Malted Milk quickly restores depleted energy and vitality.

It is highly digestible and contains all the essential elements of a well balanced food.

## THE DUSTY HIGHWAY

BY CHRISTINE WRITING PARMENTER  
Copyright 1929

CHAPTER XXIII.—Continued

He stopped abruptly, while Angela cried, her voice sounding unnatural, like some piece of machinery long unused: "What does that mean?"

"That we had the drift," Myer sank down beside his wife, and taking the child into his arms, rested his cheek tenderly against her hair.

Nick looked away, thinking: "I shall never hold Gary in my arms." His throat ached intolerably, and not caring who might see, he buried his face in his arms.

Yet, after what seemed an eternity of misery, his heart lightened. He had been right. The sea was calmer—even there in the cabin it was evident. Thank God the propeller had held out through the worst violence. Perhaps now . . . if no fresh gale swept them . . .

He dared not hope; yet with the coming of day the wind died, as if spent by its own fury, and the rain became a steady downpour that fell like oil upon the troubled waters. After a long, almost breathless interval Nick looked at the Colonel, his eyes asking a question, and from the Colonel to Myer, who had risen unsteadily to his feet. The boat lurched, and he stumbled—fell—but sprang up, and without a word went out, followed by Nick. When he returned he said, his voice harsh with feeling: "The captain thinks the worst is over. If we're far enough out so that we strike no land until the water is less disturbed; and if we have the luck to drift into some safe harbor . . ."

He left the sentence unfinished, while across the cabin his wife's eyes met his.

The Colonel said: "Thank God!" and his voice shook.

Angela sank back weakly, putting a hand over her trembling mouth, while from Amy Myer, clasping her child closer, came a dry sob.

All day they drifted; yet, overcome with exhaustion, they also slept in snatches, and the hours passed, till, almost reluctantly, it seemed, the rain lessened—then ceased to fall. Slowly the clouds lifted, revealing a wild waste of restless sea. The day brightened; the waters grew more calm; and despite the fact that they were derelicts, drifting perhaps toward some perilous, hidden reef, hope sang in their hearts.

It was at dawn next day that Nick awakened suddenly from a heavy sleep. It seemed to him that the boat shuddered, and then stood still. In an instant he was on deck, but the Myers and Colonel Nowell were there before him, gazing in rapture at a wooded island a half mile off. "See Bird!" had struck upon the bar, which held in it a tenebrous grip from which it was never to be dislodged; but already the men were preparing to lower a boat.

Nobody spoke. No one seemed able to speak. The Colonel was plainly too moved for words. Amy was

thinking with the exaltation of one relieved: "My little Marie will live! She is going to live!"

Nick stood in a sort of trance. After that first enraptured moment he did not see the island, nor the palms, nor the dancing waves that looked angry no longer in the morning sunlight. He saw dimly, through tears of which he was unashamed, a little young figure clad in a khaki middie, a crimson tam upon her head, a crimson sweater on her arm, a headscarf coming over her shoulders, and on a stick across her shoulder.

It was Angela who broke in upon this vision. She approached quietly, the only member of the party who had thought of raiment. Her gown rivaled the blueness of the sea, and of her own eyes.

"Well, that looks something like!" Her voice jarred on the atmosphere like a discordant note. "I suppose we're in some horribly out of the way spot. Why on earth couldn't we have struck a place where we'd be picked up within a week? I detest camping!"

The spell that had held them all was broken. Everyone looked at her in blank amazement, even the captain who was approaching to speak to Myer. Their eyes were shocked. Indignant, but Angela was unaware. She said, addressing the captain: "In a manner that was a bit arrogant." "Look here, Captain, where are we anyway? How long are we likely to stay in this God-forsaken spot?"

The captain's eyes met hers, and at something in their depths her own eyes dropped. He had followed the sea for many years—encountered danger, death, famine, many times; but without often had he been called upon to live through hours like those that had just passed. He was a plain man, blunt of speech perhaps, but deeply religious at heart, as are most men who have met death face to face. His eyes left Angela's to dwell on the scene before them: the rippling water—the clear sky—the fairy island set like a jewel amid the blue.

"God-forsaken!" he said. "His eyes came back to hers and heamed like steel."

"But for His goodness, Madam," he added grimly, "you would now be food for the sharks. You should be on your knees."

CHAPTER XXIV.

Halliday had been gone three weeks. "Remember," he said to Simon in his parting, "that bad news travels faster than good. If I haven't nothing it will be because there is nothing to hear. Should I get any sort of clue I will send a message. I shall stop everywhere, inquire wherever there is anyone to inquire of, and explore every island. I haven't the dimmest idea how long it will take; but I shall leave nothing untried. I know you will do your best to keep up her. Hastings' courage; and I know, too, how much harder a task you have before you than have I."

Three weeks, and no word of any kind. "It seems three years," said Gary: then closed his lips as if ashamed to have admitted even as much as that. There was a fragility in her face these days that frightened Simon; a look of waiting that was sadder than any tears. The doctor said it, too.

"Yes, dear child," he said on leaving her one day, "you are going through a terrible experience. It won't hurt, you know. Sometimes they heal. Why don't you cry?" She smiled at him wistfully. "I'm afraid to. When I cry, Dr. Bennett, I cry so dreadfully. After the baby comes, if it's not a new one of Nick—I'll let myself go. I don't dare to now. It would make me ill. You've never seen me cry, Dr. Bennett, or you'd understand."

"But I know," the doctor confessed to Mary Maxwell that afternoon. "She's the bravest woman I ever saw, and I've seen many. To hear her talk so calmly about their father to those little boys—as if he had—well, just stepped out for a moment and would be right back—God! Mary, I would I don't see how old Simon Bartlett stands it!"

"He stands it because he's something of a hero; but he has aged shockingly. Is there anything more that we can do for them?"

He answered with a hopeless gesture. "You can drop in every day and appear cheerful. I wish Gary had no mother; but there I guess you're not a bad substitute, Mary Maxwell."

Mary smiled, and said: "I've sent for Janey. I think it will do Gary good to see her. They're such close friends, and Janey's always so optimistic. She's like a breath of mountain air. She's written me the other day that she's 'felt in her bones' the doctor's coming back; and if she can instill that feeling into Gary it may help."

"Good!" said the doctor heartily. "Janey's a tonic. I always said she grained me when she was born!"

It was about a week after this conversation took place, that thousands of miles away on a coral-tipped island, Nick faced one of the blackest

## Summer COLDS

Almost everybody knows how Aspirin tablets break up a cold. But why not prevent it? Take a tablet or two when you first feel the cold coming on. Spare yourself the discomfort of a summer cold. Read the proven directions in every package for headaches, pain, etc.

Made in Canada

moments of his life. He had gone for a tramp. Angela complained that he was always tramping.

"Why not?" he answered. "Someone must patrol this island. Who knows from what side a boat might appear at any time?"

"You might at least ask for company," she pointed.

"I don't want company," he replied bluntly. He was a little weary of the "injured innocence" appeal. "Besides, I can't take you because you'd get tired by half a mile or two, and I'm going farther. I think that point of land off to the south would be a good place to build a signal fire."

"But you're already built dozens! When you're not building them you're making plans for starting out with the captain in a small boat. It's absurd. If any lives are to be risked it should be the lives of those common machinists. Besides, if the captain were any good he'd know where we are."

"Look here," said Nick a bit petulantly, "haven't I explained dozens of times that a man might live on the high seas all his life, and still know very little about these islands? They're off the main line of ocean travel. He knows our latitude and longitude, of course, but his map doesn't show all the smaller islands, and we're not how far off the next one may be. Our food won't last forever, Angela, though waters a far more serious problem. You sneer at the captain because he's not your sort—"

"Is he your sort?" she broke in angrily.

(To Be Continued.)

### Too Far To Drop

Trip Through Upper Reaches Of Air. Not Likely To Be Popular.

When a staid and scientific person does go in for high flying, Professor Picard, for example. Having made one little trip to the neighborhood of the ten-mile level, he now steps forward with a calm statement that constructors contemplating intercontinental air travel at a rate of some 400 miles an hour may safely soar on their work and "take it for granted that travelling through the stratosphere is not dangerous," and that man can live in the irrespirable layers of the earth's atmosphere. "They can rest content of it," says the professor.

Maybe Dr. Picard is right. He has been to the country he is talking about and only one other has, so it is difficult to contradict him. Nevertheless, we have a feeling that it is going to be quite a while before the stratosphere route will be really popular through the ordinary public. Traveling through the upper reaches of the air may be made safe, as long as the travelling continues. Suppose it stops. Height in moderation is all right, but ten miles would be a fearful distance to fall. A person could think of altogether too many painful ways while the operation was under way.

### Maintains Fliers Just Circle North Pole

North and South Trip Around World Not Possible Says Volvia

Wilbur Glenn Volvia, overseer of the Christian Catholic Apostolic Church, Zion, Illinois, and proponent of the theory that the world is flat, has his own ideas about around-the-world flyers. Asked about them he said:

"Around-the-world flyers? They just go in a circle around the North Pole. The trip through the equator will be comparatively easy to make, but the trip around the earth in a straight north-and-south direction will not be accomplished for the reason that it cannot."

Suspicious Old Lady (on the farm)—What's that stuff on those sheep? Farmer—Wool.

Suspicious Old Lady—I'd bet it's half cotton.

More than 2,200 tons of artificial pearls were exported from Czechoslovakia in the last year.

### Frequent Drowning Accident.

Perils That Lurk in Lakes and Rivers Should Be Stressed

While hopeful progress is being made in the prevention of certain classes of accidents, it is very evident that a campaign of education in regard to the perils that lurk in lakes and rivers is required. Too many young lives are being needlessly sacrificed.

No less than eight drownings occurred in Manitoba in the last week-end in June. Twenty-two people met death in boating and bathing accidents in Ontario during the last week-end. One hundred and thirty-nine lives were lost in the same way on the Fourth of July in the United States.

The deplorable toll is mainly of young people, who seek the legitimate and wholesome pleasures of boating and bathing but who forget that the waters are merciless to those who are careless or take undue chances.

The fatalities that are continually happening indicate that the danger is not sufficiently realized by the young people, and points the necessity for a systematic campaign of prevention.—Manitoba Free Press.

## THE RHYMING OPTIMIST

By Aline Michaelis

### YESTERDAY

What is yesterday, my Dear? Just a shadow leaving; Worth no tribute of a tear, Worth no moments grieving.

Brave hearts thrust aside the past, Gauds or gold it brought them; Flinging all away at last, Save the truth it taught them.

What is yesterday, my Sweet? Just an echo going Down a bare, untrodden street Where no life is flowing.

Leave it as a brave heart must With no thought of sorrow; Putting all your faith and trust In a glad tomorrow.

Miller's Worm Powders seldom fail. They immediately attack the worms and expel them from the system. They are complete in themselves, not only as a worm destroyer, but as a highly beneficial medicine for children, correcting weak digestion and restoring the debilitated system to healthiness, without which the growth of the child will be retarded and its constitution weakened.

### Depression May Be Helped

Teaches People How To Face Adverse Conditions With Fortitude

In time of depression prepare for prosperity. By doing that you can keep your mind off your troubles, make life easier, and you can lay a foundation of policy that will be helpful in keeping prosperity from flying away a second time, once it has returned. Adversity is seldom sweet, but it is the practice of fortitude and the ability to profit by experience are marks of character and good sense; and character and good sense are the foundations of about all that is worth while in life.

### An Expensive View

Proprietor of Mountain Hotel (to newly arrived guest): This is your room, sir. If you want a fine view over the mountains put a franc in the slot and the shutters open for five minutes.

"What is the matter with that baby that he always cries?" "He is getting his teeth."

Some of the swords and daggers used by Mayan Indians in Yucatan were of chisel wood, which is extremely hard.

## Aching CORNS STOP HURTING

INSTANT RELIEF!

Just a drop or two of Putnam's Corn Extractor, and the pain goes away. Relief is almost instantaneous. Removing corns with "Putnam's" is so easy, so sure, so painless—thousands use this wonderful remedy, and say it is the best. Don't suffer any longer, use Putnam's Corn Extractor, the sure relief for sore corns. Sold at every drug store, 25c.

PUTNAM'S

## The ADVENTURES OF CAPTAIN JIMMY and his Dog SCOTTIE

WHAT CAME BEFORE AFTER many adventures, flying over China, Captain Jimmy is forced to land behind the enemy's lines. He places a rail on the military camp to secure gasoline and

While Lieutenant Burns threw the military camp into an uproar, I whistled softly to Scottie and groped my way through the darkness toward the light, imposing task.

Quickly I slipped under the canvas and felt my way quietly around the sides. As my eyes grew more used to the darkness, I could see the outline of a large cot on which someone lay sleeping soundly. I scarcely dared to breathe I crept slowly forward. Just before I reached the cot, I heard a faint rustle. I grabbed him and he started. Under his pillow I discovered no less than a revolver and a knife. The man I threw away. One pistol I pocketed, with the other I pointed at him. He was wrapped in a blanket, I showed my capture of the man and he made his way along to where the horses were, making him tick."

Once we had put some distance between ourselves and the enemy, I turned to our prisoner. To camp, we questioned the "chinese" and he had secured no less than a percentage than General Fong as a host. Chinese labor at all.

"Tell him," I said, "that as soon as it becomes light, he'll write me an order for five gallons of gasoline, twenty gallons of oil and a supply of food, and if he doesn't do this, I'll make him take him apart by hand to see what makes him tick."

The interpreter translated my message. "General Fong," he said, "has said to me: 'He says you surrender now and I scolded as fiercely as I could. The

poor Chinese looked so funny in his night clothes and blanket, yet he had not forgotten his rank of General. Pulling out his pipe, he made a number of horrible faces, expressing the desire of releasing him that he might carefully listen to him if he continued to refuse our demands."

Being a sensible man, and a General, he decided to yield handsomely since I had him."

"He says," he can do," translated Fu Hsi, "valley glad to do such little favor for his captives."

At daybreak I rode out to the camp with the General's written order in my pocket, and his good against him on my finger, as proof of my authority. The camp was quiet and immediately we were sighted a group of mounted men galloped out and surrounded us in a good and commanding tone I stated that we were taken at once to the commanding officer. To him I showed the ring and made the demands for gas, oil and food. We got plenty of immediate action. Mr. and Mrs. D. Hoyle and family returned on Saturday from Edmonton, where they had been holidaying since July 1, while Mr. Hoyle was marking examination papers at the University.

William Ford is in hospital, having undergone an operation. Last year he was working in Vancouver, and received an injury there which at the time he did not consider serious. It recently caused him such pain that an operation was necessary, and he is getting along satisfactory.

Mrs. Guerard is agent for the grand draw of four automobiles to be given away at the exhibition at Victoria, B. C., in August. She has tickets on sale at 50c each. Mickey McKay, formerly prominent in hockey circles in the Pass, was advance agent and was here last week.

Tony Pondelick has been demonstrating the new Plymouth car which has some unique features which appeal to drivers of cars, especially amateurs. Without engaging the clutch the speed can be changed by simply setting the gear lever, while the "floating power" installation gives as smooth a running car as an eight cylinder. Its about as near fool proof as it is possible to make a car.

Mrs. Lola Altermatt is again playing for dances in the Pass towns, and has as members of her orchestra George Vincent, trumpet; Joe Pavlus, saxophone; Frank Johnson, violin, and Billy Picard, drums. They play to morrow for a dance at Natal opera house, organized by Paul Barons.

J. Fred Spalding, manager of Camera Products Company, Vancouver, was in town last Friday calling on his local agent, McBurney's drug store. Several years ago he lived in Fernie, and was for five years commissioner of the South eastern British Columbia good roads association, which did a great deal of good work in hastening the construction of the highway through the Crow's Nest Pass.

A merry party of fishermen will leave on Sunday to camp for a week at the northwest branch several miles north of the Gap. They will camp at one of the favorite spots formerly used by Coleman parties. Those going are Chief J. Houghton, Sid Short, A. E. Guerard, Albert Knowles, Henry Tiberghien and Col. R. F. Barnes, who will join the party on his return from Sarcee camp, where he is attending a short course.

"The Hope of the World" is the title of the lecture to be delivered by Judge Rutherford, on Sunday, July 26, which will be heard over Station CJCJ Calgary, KOA Denver, and KSL Salt Lake City, between 10 and 11 a.m. local time. He will speak on world-wide business depression, unemployment, revolutions, oppression, distress, and hunger. His message will be carried on a continent-wide network, direct from the Coliseum at Columbus, Ohio.
